

*PrimAire Retractable Screen Doors*® is the ultimate solution for retractable screen door systems, and was born out of the need to build a more durable, well-crafted door, with top functionality and an aesthetically appealing design.

*PrimAire Retractable Screen Doors*® can be installed on virtually any opening including single doors, French doors, in-swing and out-swing doors, sliding glass doors, multi-panel sliding glass doors, ornate doors, entry doors and more. *Contact your dealer today for more information and pricing.*

## Patented Double Door Lock System

The *PrimAire Retractable Screen Doors*® patented Handle Lock System is the leader and ultimate solution for double doors. With one convenient twist of the Lock Nob, one side of the retractable screen door remains stationary, while the other side is fully operational from both directions. This allows easy entry into the home while in use. When releasing the stationary side, there is no need to reach and stoop for latches; simply twist the Lock Nob again and fixed side of the screen retracts back into its protective housing.

### Frame Colors:

Porcelain

Tusk

Stone

Bronze

Onyx

### The Difference

While retractable screen doors have been around for over 40 years, earlier designs were developed without the benefit of long-term testing and engineered without experience in the real world. *PrimAire Retractable Screen Doors*<sup>®</sup> experienced designer spent 15 years in the industry, installing and maintaining retractable screen door systems, and has interacted with over 10 different brands on the market. This enabled him to analyze the benefits and flaws of each design, as well as listen to issues and concerns from thousands of customers. This difference is what makes *PrimAire Retractable Screen Doors*<sup>®</sup> the industry leader.

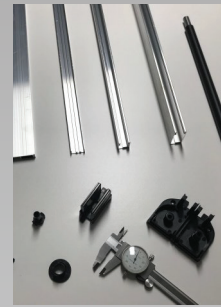

### Superior Functionality

Every component of *PrimAire Retractable Screen Doors*<sup>®</sup>, from the extruded aluminum, to the injection-molded, UV protected plastics, have been designed and manufactured to the most exacting standards. Tolerances are held tight so that functionality is smooth and solid.

### Performance

In design, "Form Follows Function." Therefore, all components of *PrimAire Retractable Screen Doors*<sup>®</sup> employ crisp, clean lines. After all, one main benefit of a retractable screen door system is to be unobtrusive and blend int the doorway.

### Durability

While manufacturing tolerances are tight, functional tolerances are very forgiving. This allows *PrimAire Retractable Screen Doors*<sup>®</sup> systems to continue operating smoothly longer, as well as provide for ease of repair in the event of damage.

### Ergonomics

The *PrimAire Retractable Screen Doors*<sup>®</sup> handle was designed to allow for the most natural and intuitive motion when pulling out the screen to the closed position, as well as when releasing it from the full-length magnetic latch/seal, retracting the screen back into its protective housing.
